## BioRePeelCl<sub>3</sub><sup>®</sup>

BIPHASIC TECHNOLOGY

## BIPHASIC TECHNOLOGY

Why is it important?

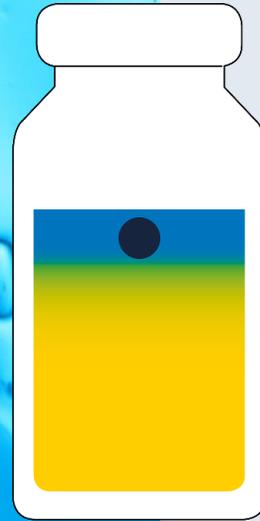

### MONOPHASIC TCA

1. Preservation in fridge
2. Oxidation and denaturation
3. Unstable products
4. Darkening

### BIPHASIC FORMULATION

1. Room temperature stability
2. No TCA oxidation
3. No formulation darkening and degradation
4. Functionalized lipophilic phase

## LIPOPHILIC PHASE ACTIONS ACTIONS

- **Stabilizing and protective**

It prevents trichloroacetic acid oxidation and stabilizes the formulation separating the aqueous phase from the oxidating atmosphere inside the ampoule. It consequently improves the performance and effectiveness of the product.

- **Film formation and vehiculating**

It reduces trans-epidermic water evaporation and assists active principles' vehiculation.

- **Regenerating**

It restores and maintains cutaneous hydro-lipidic film.

- **Moisturizing**

It increases hydration through direct and indirect mechanisms.

## HYDROPHILIC PHASE ACTIONS

- **Biostimulating**

It stimulates fibroblasts' activity and activates cutaneous proliferating and biosynthetic processes.

- **Revitalizing**

It increases cellular turnover and production of collagen, elastin and hyaluronic acid.

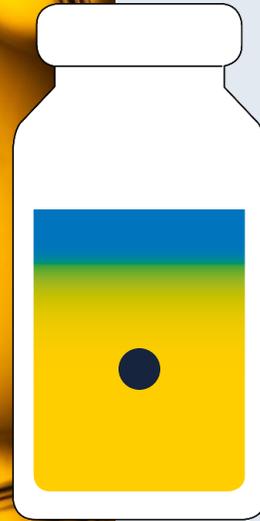

- **Keratolytic and peeling**

It removes outer cells of stratum corneum by breaking corneocytes' adhesion bonds.

This process promotes active principles penetration.

- **Anti acne enlarged pores comedones**

It helps battling acne, it eliminates comedones and it has an astringent effect on enlarged pores.

## BIPHASIC TECHNOLOGY

### Overview

The **lipophilic** phase floats on the **hydrophylic** phase protecting it from the oxygen inside the bottle.

The mechanic barrier stabilizes the hydrophilic phase: **TCA** and other active ingredients do not oxidize.

The density difference between the two phases guarantees constant protection even after shaking.

# BioRePeelCl3<sup>®</sup>

## FEATURES

- NO NEEDLES
- PAINLESS
- FAST
- MULTIFUNCTIONAL
- IMMEDIATE RESULT
- NO POST TREATMENT SIGNS
- FOR THE WHOLE BODY
- FOR ALL AGES
- FOR ALL SKIN TYPES
- FOR ALL SEASONS
- NO PHOTSENSIBILIZATION

## 4 FUNCTIONAL COMPLEXES

Bio

- GLYCINE
- PROLINE
- HYDROXYPROLINE
- VITAMIN C

Re

- GABA
- ARGININE
- RIBOFLAVIN

Peel

- TCA
- LACTOBIONIC ACID
- SALICYLIC ACID
- TARTARIC ACID
- CITRIC ACID

Lip

- SQUALANE
- ISOPROPYL MYRISTATE

# BioRePeelCl<sub>3</sub><sup>®</sup> FND

Face | Neck | Décolleté

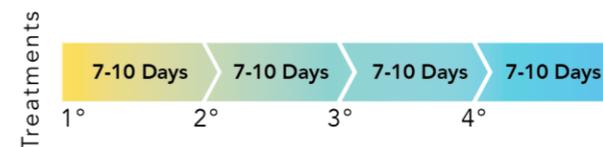

- Trichloroacetic Acid **35%**
- Lactobionic Acid
- Salicylic Acid
- Tartaric Acid and Citric Acid
- Glycine, Proline, Hydroxyproline and Arginine
- Vitamins C and B2
- *gamma*-Aminobutyric Acid
- Squalane
- Isopropyl Myristate

**FORMAT** 5 ampoules 6 mL each

**USE PROTOCOL:** Apply on the affected area every 7-10 days for up to 4-6 sessions depending on medical evaluation and treatment targets.

**EXPOSURE TIME:** 3-5 minutes according to patients tolerance.

# BioRePeelCl<sub>3</sub>® BODY

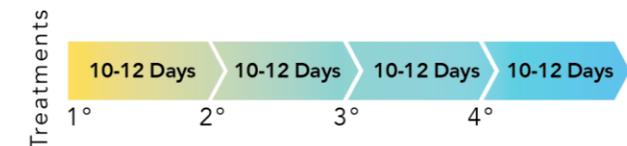

Hands | Elbows | Buttocks | Knees | Feet

- Trichloroacetic Acid **50%**
- Lactobionic Acid
- Salicylic Acid
- Tartaric Acid and Citric Acid
- Glycine, Proline, Hydroxyproline and Arginine
- Vitamins C and B2
- *gamma*-Aminobutyric Acid
- Squalane
- Isopropyl Myristate

**FORMAT** 3 ampoules 12 mL each

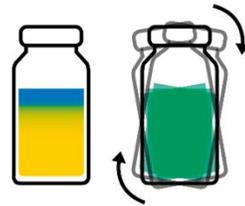

**USE PROTOCOL:** Apply on the affected area every 10-12 days for up to 4-6 sessions depending on medical evaluation and treatment targets.

**EXPOSURE TIME:** 3-10 minutes according to patients tolerance.

# BioRePeelCl3<sup>®</sup>

## Application

1. Shake the ampoule for a few seconds until colour turns green for a temporary emulsion.

2. Using a syringe, prelate the quantity of product for the treatment. REMOVE THE NEEDLE.

3. Apply the product with nitrile gloves on treated area and massage until it is completely absorbed.

4. After the exposure time, carefully clean the zone with a gauze soaked with water.

**N.B.** After a few minutes the product will return to its initial biphasic state. It is necessary to shake the ampoule before every use.

# BioRePeelCl<sub>3</sub><sup>®</sup>

## Associations

You can use BioRePeelCl<sub>3</sub><sup>®</sup> also in synergy with other treatments to improve their performance and result:

KIND OF TREATMENT	WHEN
INJECTABLE TREATMENTS	Before
PHOTO STIMULATION	Before
RAFIOFREQUENCY	After
TOPICAL TREATMENT	Before

# BioReTherapy

## POST TREATMENT CARE

We created BioReHydra® and BioReLift® to improve the results obtained during and after the BioRePeelCl<sub>3</sub>® protocol

# BioReHydra<sup>®</sup>

It is a post treatment **serum**, a fast-absorbing hydrogel with light texture.

It donates a fresh skin feel, with moisturizing and lifting effect from the first application.

The formulation has over **15 active ingredients** such as:

- 3 Oceans' extracts:
  - Atlantic Ocean
  - Pacific Ocean
  - Indian Ocean
- Micronized Hyaluronic Acid
- Vitamins
- GABA
- Amino acids

# BioReLift®

It is a post-treatment **cream**, presented as a soft, easily absorbed emulsion.

With a silky texture, it donates an enveloping skin feel from the first use.

The formulation has over **20 active ingredients** such as:

- Micronized Hyaluronic Acid
- 4 Biomimetic Peptides
- Argan & Almond oils
- Colloidal Platinum
- Shea butter
- Vitamins
- Bisabolol
- Amino acids

BioReHydra®  
and BioReLift®,  
as BioRePeelCl<sub>3</sub>®,  
can be used for:

**WHOLE BODY**

**ALL AGES**

**ALL SKIN TYPES**

**ALL SEASONS**

# BioReHydra® and BioRelift®, 2 sizes for 2 main needs:

200 mL

## In the clinic

Specific for the physician to offer a synergistic post-treatment to the BioRePeelCl<sub>3</sub>® protocol and to improve the excellent results obtained during the outpatient treatment.

## When?

- Immediately after BioRePeelCl<sub>3</sub>® treatment
- Immediately after radiofrequency treatment
- Immediately after laser and photostimulation treatment

30 mL

## At home

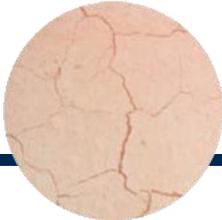

For the patient to have a specifically-developed home treatment, which enhances the results and benefits of the BioRePeelCl<sub>3</sub>® treatment between one session and another.

## When?

- In the morning or evening during BioRePeelCl<sub>3</sub>® protocol
- In the morning or evening after BioRePeelCl<sub>3</sub>® treatment ends
- As coadjuvants for other aesthetic procedures

# How to use at home?

Dry skin

MORNING

EVENING

Normal or combination skin

MORNING

EVENING

Oily skin

## WARNINGS

Avoid contact with eyes, mucous membranes and nails.

In case of accidental contact, rinse with plenty of water or eye washer.

Avoid the combination with retinol, retinoids (i.e.: isotretinoin) and derivatives. Usage should be stopped one month before for topical application, three months for oral formulations
